Subject: working version of EPA comment letter on the D3 ORR EMDF/EMWMF waste water FFS
Attachments: 07-XX-21 -- EPA ltr - EMWMF-EMDF RAD WW FFS w notes.doc

Importance: High

I've made some minor revisions to Carl's version, plus added statements about 1) justifying fish consumption rates, 2) meeting water quality standards throughout the creek not limited to areas that may be attractive for fishing, and 3) eliminating dilution/attenuation. Note, Carl's proposed language says EPA expects the public to have an opportunity to review/comment on the FFS – so take a look at that and let us know if you agree/don't agree.

Jon – do you have any comments, particularly on appendix K?

Martha is on vacation this week. I asked her to have her comments by end of next week (7/22).
